PROFILE

I'm a Web Developer focusing on the Front-End. I have experience using HTML5, CSS3, JavaScript, React, and more. My biggest asset is that I enjoy programming. I'm consistently learning new skills along with honing the skills I already possess.

SKILLS

HTML5, CSS3, JavaScript, Grid, FlexBox, Sass, Responsive Design, React, NPM, and Git.

PROJECTS

Instagram Clone

Used React, React Router DOM, Material UI, and Firebase to create an Instagram clone. User is able to create an account, post pictures with captions, and view posts from other users.

Expense Tracker

Used React (including useContext, useReducer, useState, useEffect, and custom hooks) and Material UI to create an expense tracker app. User is able to add and remove income and expenses throughout different categories.

White Water Rafting Website

Utilized JavaScript, SASS, and HTML to create a landing page for a white water rafting company.

EDUCATION

University of Arkansas — Supply Chain Management - 2015
